Course/Track Layout

March 2, 2010 Pre-workshop day

A New User training class will be held from 1:00pm to 5:00pm for all attendees that are new to WebEOC®. It is imperative that all new users attend this session prior to attending the Workshop. This class will establish a foundation for the rest of the Workshop by providing the basic user interface. In this class you will be given a WebEOC® username and password to use throughout the rest of the Workshop.

Track Information

The Workshop will consist of five tracks: Command, Operations, Medical, Planning, and Logistics. At completion of registration you will be asked to select the track that you prefer. Each track is limited and will be available on a first come basis so make sure you register

Special Wednesday Evening Dinner

Paul Williams, MD. , Founder of International Healthcare Networks, will present excerpts from his disaster relief efforts and challenge the individual to step up and be prepared. *“His experience in over 100 nations and disaster relief work makes him qualified to speak on... the subject of disaster preparedness”*

- Admiral Vernon Clark USN (Ret)
 Chief Naval Ops 2000-2005.
